Precipitation probability							
00%	00%	30%	90%	70%	60%	30%	30%

Forecast for Monday 27 Dec 2021

Weather: Dry with some clear spells in early hours, but low cloud onto southern and eastern slopes with patchy drizzle and cloud thickening later in night. A cloudy, rather dull start with occasionally heavy rain soon sweeping in from the southwest. Turning to showers in afternoon and cloud will lift and break a little to perhaps allow for some brighter spells, but staying mostly cloudy and some showers will be heavy with risk of hail and thunder. Showers dying out in evening but staying cloudy with light rain or drizzle from time to time.

Chance of cloud free mountain/hill tops above 600m: 30% soon nil, becoming 30% again in afternoon

Visibility: Moderate or good beneath cloud, but poor in heavy rain and showers. Often very poor at height in morning, some cloud down to 300m at first on southern slopes and extensive cloud down to 400m in heavy rain. Cloud becoming more broken in afternoon but still large amounts above 500 or 600m.
